

LEPIDOPTERA

UK Butterflies

Butterflies were far more abundant in my childhood than they are today. In order to see our rarest species one has to visit a Nature Reserve. Ranging in size from the smallest pocket of land to much larger areas stretching across county borders. These designated areas are protecting some of our most important habitats and their flora and fauna from the impact of developers, pollution and pesticides.

The gradual decline in the UK's butterflies has hastened since the nineteen seventies, meaning that several species have become dependent on this protection for which thankfully there is a greater understanding. Something the charity Butterfly Conservation is devoted to. Without their expertise and the support they receive along with the work of thousands of volunteers and that of other conservation groups several species would be much closer to extinction in the UK. Two species suffered that fate in the 1970s, the Large Blue and Chequered Skipper. After painstaking work the Large Blue has been successfully reintroduced and there is hope that the Chequered Skipper can once again become re-established in England. Even though most of our resident species do well on the continent it would be a great tragedy to permanently lose any of our butterfly and moth fauna.

In his book *The Last Butterflies* Nick Haddad refers to these beautiful creatures as 'ambassadors for nature'. Emphasizing in his conclusion that disturbances both natural and human-caused are necessary for the ecosystems that support butterfly populations to thrive.

LYCAENIDAE

Adonis Blue

Silver-studded Blue

Chalkhill Blue

Large Blue

Common Blue

Holly Blue

Small Blue

Brown Argus

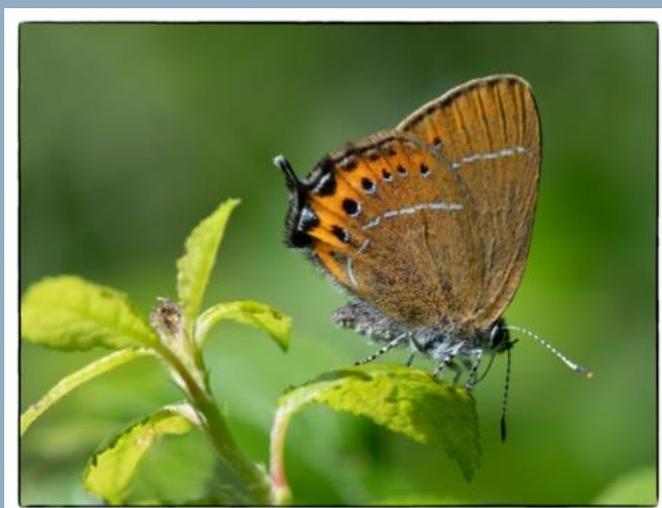

Northern Brown Argus

Brown Hairstreak

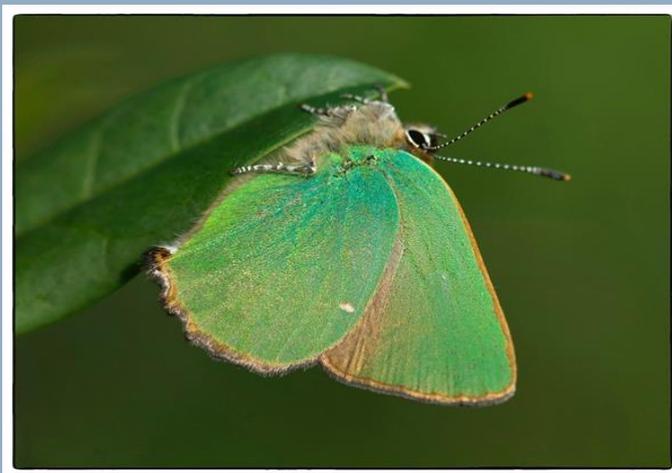

Purple Hairstreak

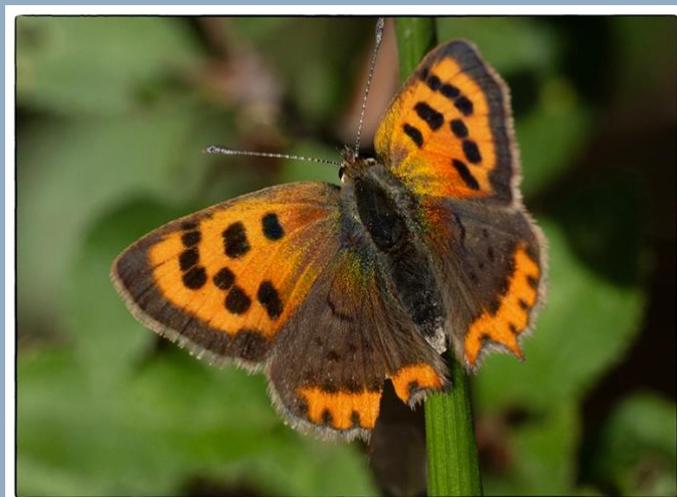

Black Hairstreak

White-letter Hairstreak

Green Hairstreak

Small Copper

PIERIDAE

Wood White

Cryptic Wood

Orange Tip

Large White

Small White

Green-veined White

Clouded Yellow

Brimstone

NYMPHALIDAE

Wall

Speckled Wood

Large Heath

Small Heath

Mountain Ringlet

Scotch Argus

Ringlet

Meadown Brown

Gatekeeper

Marbled White

Grayling

Pearl-bordered Fritillary

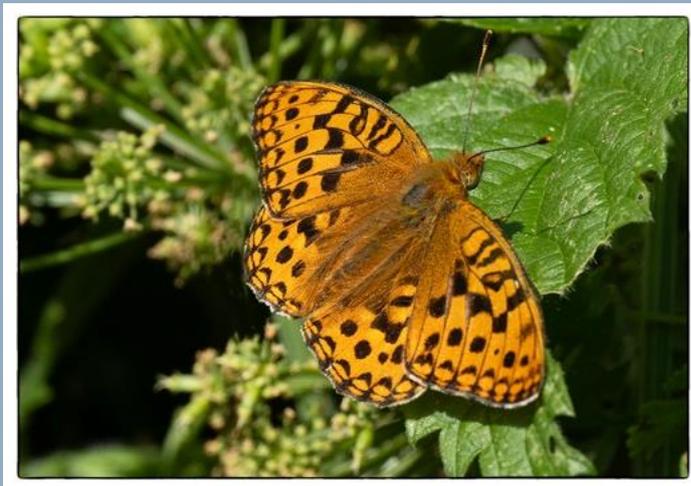

Small Pearl-bordered Fritillary

Silver-Washed Fritillary

Dark-green Fritillary

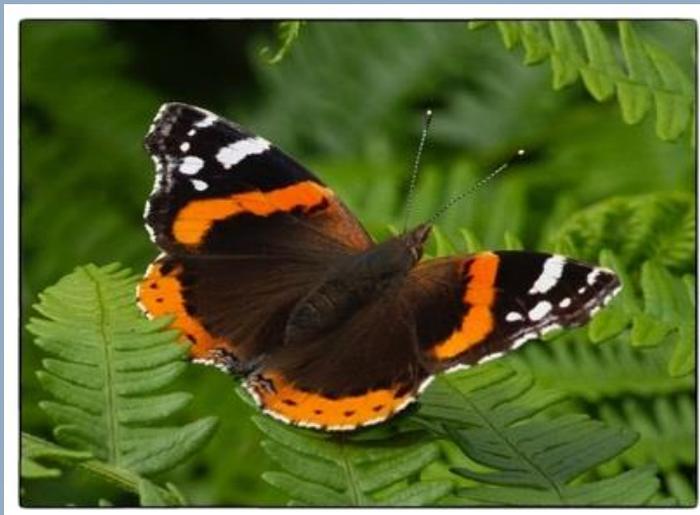

High Brown Fritillary

White Admiral

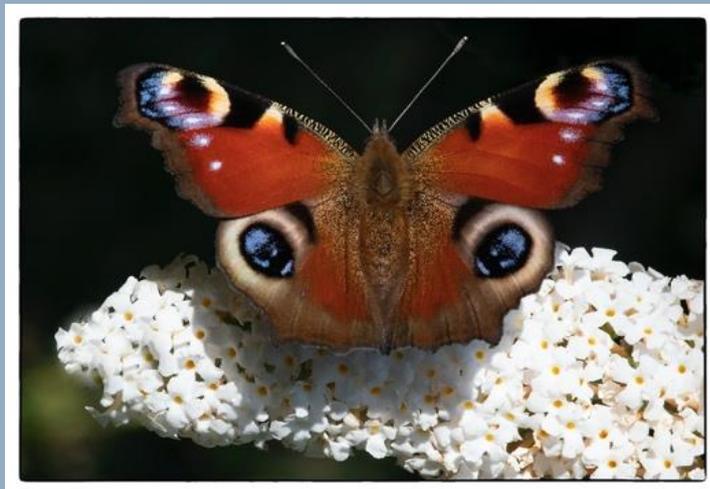

Purple Emperor

Red Admiral

Painted Lady

Peacock

Small Tortoiseshell

Large Tortoiseshell

Comma

Marsh Fritillary

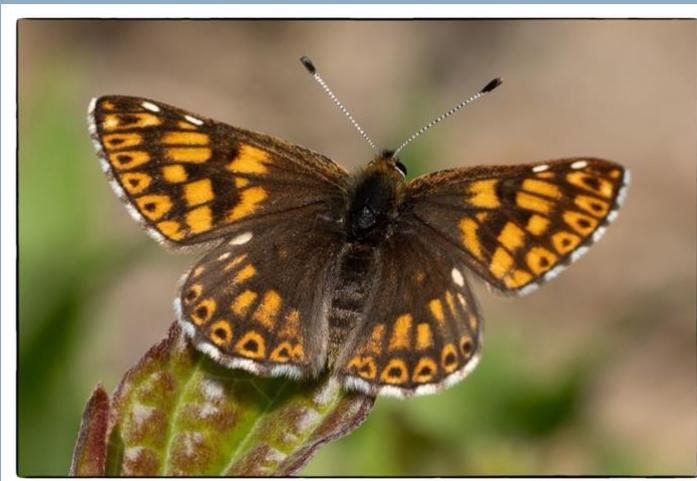

Glanville Fritillary

Heath Fritillary

RIODINIDAE

Duke of Burgundy

HESPERIIDAE

Dingy Skipper

Grizzled Skipper

Chequered Skipper

Essex Skipper

Small Skipper

Lulworth Skipper

Silver-spotted Skipper

Large Skipper

PAPILIONADA E

Swallowtail
